John:

I have discussed the embedded the Central Wire responses to EPA's comments in your email below. I have discussed these responses with Central Wire and have been authorized to submit them to EPA.

Will you or Bob be joining us next week?

Regards,

Jack

Subject: 2014 CMI Field Investigation Work Plan - 9-5-2014.doc

Mr. Ruopp,

The EPA approves the 2014 CMI Field Investigation Work Plan - 9-5-2014.doc with the following comments:

1. "If VOCs are found in these wells, Central Wire will discuss the next steps with EPA before taking any additional action." Techalloy will provide EPA with the analytical data from the sampling effort within three weeks of collecting the samples. If maximum contaminate levels (MCL) are exceeded in any of the leading edge of the plume samples locations, then Techalloy will continue sampling until the edge of the plume is determined. The EPA requires at least two weeks' notice before any new site work begins.

Agreed.

2. Minor issues: Table 2, sampling dates are reported as Oct. 2012. This date appears to be incorrect.

Our copy shows Table 2 as 2011 data.

3. In Tables 1 through 3 all report the same sampling locations. Is this accurate?

Yes, this is correct. The same locations will be sample in 2014 also.

If you have any questions please contact me.

Respectfully,

John Nordine, CPG, LPG
